theplaguecan't you just complain to EA?

O, ok, i take it back, (key word: EA == Crappy,crap,crap)

but would any *former* westwood programmers have a copy that they wanna share
annonomously ???

I wouldn't be saying anything about EA games if I were you. They are a business not a group of programmers going for a good time and some good laughs.

Servers cost money. Bandwidth and server space. Do you know how much bandwidth it takes to maintain 3 server lobbies?

Everyone is lucky renegade is still online. EA games sure aint making any money of Renegade.
