Subject: server
Posted by Gohla on Tue, 01 Jun 2004 17:38:46 GMT

Server is running debian 2.4, its not supported but the server works fully except that brenbots slow.

specs are:
256 mb RAM
AMD Duron 1600

and will soon be upgraded to 512 ram, it should be enough to run a 20 player server.

Im running brenbot on irc.st0rmhosting.com
