[A1HITMAN]CrimsonNot only is it prevented, but we log the attempt and if we see you trying it a lot, you'll be banned from the network.

So in other words... if you piss off crimson or some other member of the team for some other reason even if it isnt cheating you might find yaself "BANNED" from "THEIR" network.

Wrong. It has nothing to do with pissing anyone off. If you hack the RenGuard network you will be banned, in some cases automatically by software routines that detect flood attempts and other attacks. I can assure you that could could "piss off" any of the RG staff and it would not result in a ban. We take RG very seriously (as evidenced by us forming a legal, registered corporation - BHS) and follow a strict code of conduct for such things.
