DAMN THIS REALLY takes me back... oh the memories... If there is a renegade glitch i know about it, thanks to my 56k with its lag killing abilities, my laptop grx card with its ability to see through walls, and my unbelievable luck to see infantry & my previous involvement with the original +HS+ clan makes for one hell of a game XD. I would sometimes find myself trying to do this on purpose. I wonder what would happen if this happened when i had a hottie or a techo with the proxys. Its hard to believe how time flies... Oh those were the days...
