Nightma14

i changed that to advertise RenGuard :rolleyes:

it doesn't matter who the hell it is. its against wol policy. You took it off only after you recived threats that your server would be constantly crashed untill you stop advertising, thanks for pissing off hardartistdwarfe, your little stunt caused all the servers to crash over and over.

In case you haven't been to the gsa lobby the script kiddies are distributing a wol ip list & exploit tool, your brilliant a000 naming scheme assures that your servers are on the top of the list :rolleyes: idiot.

brilliant 13yrd old you are. YA YOUR ARE ONLY 13.

as for xptek, that fool messages me on msn asking how to crash servers, what a loser. :rolleyes:
