DethHav0cAircraftkillerThat's the same exact Refinery as before. It's crap.

No... it's a completely different Model based on the original Westwood concept art...

Once again.. all the Criticism, No Constructive. :rolleyes:

First, that chain gun makes me happy. =O

Second, Aircraftkiller if you want to go into errors I've found vis errors on YOUR maps in RenAlert so not everything is perfect.

Third, Like Kirby said hurry up the current released beta is lame.
