So on City Flying tonight on some random server me and someone else had just gotte done w/a stealth tank rush to PP which failed

For the second rush we were going to do APC+nuke(me) & stealth tank to wep. So I'm setting in Nod base waiting to rush (NOT on the air strip) when all of a sudden my screen `cycles` like I just joined the game. No boink - no vehicle explosion just 'Please wait' type of screen you get when U join a game. So I lost my APC, my char AND my nuke !! I've never had this happen before. Is there some way the host can do such a thing ?? Like I said I wasnt on the air strip I was in front of air door right next to another tank (which didn't magicly pop). Anyways it totally pissed me off there goes 1500 credits.

ps. Lag wasnt bad.
