Subject: Announcing Renegade FDS UDP packet exploit... FIXED ;)
Posted by KIRBY098 on Fri, 18 Jun 2004 17:37:58 GMT

AlkalineDDOS attack is not the same as the UDP exploit
xtrm2matt

its precicely why the patch will remain private because their are too many morons in renegade.

Including, or excluding yourself?

If it's so private, then why post it on a public forum? PM's are these wonderful things you can use to avoid stating "LOOK AT ME, LOOK AT ME!"
