zunnieQuote:FDSConfigFile = C:\Westwood\RenegadeFDS\Server\Data\svrcfg_cnc.ini
FDSLogFilePath = C:\Westwood\RenegadeFDS\Server\

Are you sure these paths are correct?

Quote:RemoteAdminIP = 127.0.0.1

In server.ini this IP must be blank, do not enter anything here.

‾
The remote admin port maybe in use, change it from 4849 to 4749 or simular and then retry.
Check if the port is not blocked by your firewall.
