Change the Renguard startup page to top 10 renguard servers instead of top 5.

Then make it so that instead of giving you the rules of the server when you click on the name make it load up the server on renegade.

Also make a drop down menu on the start up page that lets you select what login name you are going to use.

Not sure if there are any spelling or grammer errors in what i just typed but if there are im sorry its late and im tired....
