this is what the readme says:

Bandwidth: 128Kbs   4 players
  [cable modem/ADSL] These broadband technologies typically feature
     128Kbs upstream connections (which is the important
     number).

     Note: some providers will upgrade you to a
     so called "symmetric" connection (512/512) for a
     nominal fee. This should allow you to run a 16
     player game.

  512Kbs   16 players
  [cable modem/DSL] If you have a symmetrical connection @ 512Kbs,
     you should be able to support 16 players.

  1Mbs   24 players
  1.5Mbs   32 players

since u get a so called "symmetric" connection. I think, between 30 and 40 players is possible but
renegade is a bandwithwhore so what the readme says.
Isnt completley true. :oops:
