Hi there, this is not ch4ever who is writing this text, this is his brother, because i didn't get an activation link for my account kingax003.

Ok here my question, im a Modder/Skinner/tutorials writer.. i tested much times how to create the "best" skin for a charakter or a weapon or something else. I saw much tutorials for creating skins with only one targa file, but nothing was as good as the Original westwood skin like this:

Can anyone help me please? thanks. And sorry for the question.

(Sorry for my English.. i know it isn't good, im German. )
