I was just playing on the pitts, and suddenly when the map changed renegade closed and I was like hmm I wonder... then I looked in the Renguard console and it says

[00] Bad/Corrupted file C&C_Volcano.mix has been found in your renegade directory

[00] You have been kicked from the server for cheating.

[00] You have left server The Pits (renmaps.com).

[00] Disconnected from RenGuard network

and I was like what!?

I figure my C&C_volcano must have gotten fuxored some how and I was wondering if there was a place to download it or if someone could e-mail me it. I noticed earlier in the week I couldn't join the pitts when it was on C&C volcano either, it was grayed out.
