htmlgodSince you mention it.... when Lucas and his team assembled the weapons and costumes for the original Starwars, back in the 70's, this particular weapon was just a modified German WWII pistol, the Luger, built up with some random stuff slapped on the sides.  
<http://www.littlegun.be/arme%20allemande/luger%20cal%2030%20krieghoff-1.jpg> I think we can all see the correlation.

finally i found it.. no its not from the luger

Mauser C96 Pistol

It was even used in the James bond movie: Goldfinger
