Maybe I should just put this in my signature?

Magazine and clip are in no way the same, they are completely different terms.

A magazine is any place that stores ammunition, rather it's a m60 or m16 box magazine, drum magazine, or the room where ammo is stored on a destroyer.

A clip is a mechanism that feeds the ammunition into the gun. On older guns like the Lee Enfield the bullets are attached to a clip, this clip is then inserted into the gun's internal magazine.
