Quote:npsmith82 says:
i want a !rg command
snipesimo says:
what do you want it to do?
npsmith82 says:
Very simple, just to say

Renguard status: Online
You are verified.
npsmith82 says:
something like that
npsmith82 says:
if you're not verified, show the renguard.com link instead
npsmith82 says:
Or maybe... !rg should show a list of the players ingame, who *are* verified
npsmith82 says:
RenGuard Verified : npsmith82 snipesimo blazer0x crimsson
npsmith82 says:
Okay?
snipesimo says:
hmmmmmmmmmmmmmmm
snipesimo says:
verify players or the server/
npsmith82 says:
In fact, just the server.
npsmith82 says:
The amount of times i'm playing in a game, and RG isn't responding on time, or is flooded out
npsmith82 says:
it'd be nice to know if you can get a realtime quick response from the bot, to verify that everything is working fine.
snipesimo says:
there is no such command that I am aware of :/
npsmith82 says:
That's my point, i want one
snipesimo says:
i could script it if such a command existed on the network, but it doesn't
npsmith82 says:
Something for blazer and crimson then.
snipesimo says:
yea
snipesimo says:
its not even like the network supports it but theres no webscript
snipesimo says:
it needs to be added to the network and then a webscript needs made

snipesimo says:
I could do the player one easily
npsmith82 says:
Well playerwise then, all you'd need to do, is do it to the player themselves... i.e !RG does a check on npsmith82
snipesimo says:
yea
snipesimo says:
thats what I will do then
snipesimo says:
the server is hard
snipesimo says:
there is a master server list pages, but it takes forever to get the info off of it, then its not always right
snipesimo says:
ghost servers etc
snipesimo says:
the RG team needs to add the command...
npsmith82 says:
Right

Sooo... Mac/Crimson/Blazer etc - can you add the feature?
