Well. If i wanted to cheat it wouldnt increase the dmg on weapons. Its impossible, to tell, if youre cheating, when you have modded weapons. F/E the secondary pistol fire does 50 dmg or the Nod rifle does 25. The same thing is when you let your gun shoot 10% further than normal. To prevent people using that stuff you should make Renguard easy to activate on a non-dedi server.

And ACK : GDI only is too strong on a few maps, especially the flying ones cuz the orca rapes every unit in CCR easily.
