Always.dbs contains objects.ddb.

It's modified, hence you can't join servers anymore.

Also, RenGuard doesn't recognize it as well. So it's definitely modified. Copy it from your cd.

renguard wont let any modified files be in your renegade directory so i suggest that if that file is not an important part of renegade u just delete it so u can use ren guard

Always.dbs is one of the most important files ever. However, yours have become corrupted. You need to replace it with the one from your CDs..

Got a firewall? could be someone changing things.

If you do, have you like unplugged your comp while Renegade was running? cuz I had that happen on my comp, cuz it froze during Ren, now I just throw my comp into hibernate mode so it doesn't damage anything

If above does not fix it, try this:

Uninstall RenGuard.

Uninstall Renegade.

Re-install Renegade.

Run it as thou you were going to play on WOL to get the update from the WOL server. (Play to make sure it works, I guess...)

Re-install RenGuard.

Hopefully, it should be free of bugs.
