Does anyone have any high-res pictures of the Nod Harpy from Tiberian Sun/Firestorm?

I can only find one, but it's poor quality.

Here's a tip:

Think what like the combination of Apache and Comanche attack chopper would be like.

They sort of resemble it, but it still looks quite different to me. Guess I'll have to use my imagination.

I'd say of the two the harpy is closer to the comanche helicopter. So here are a few decent pictures of that.

You just happened to pick the hardest unit in TS to find....

The best I could find was the icon, and it's even worse than that picture you had....

That does help bit, I can see what the top looks like now.

Thanks for the all the images.
