My menu looks like this:

and all my text ingame is 12 pt Times New Roman

What's wrong?

I know it's using a different font in the menu, but I didn't do anything to change it and that's a clean install with only the 1.037 patch.

Maybe your computer might have overwritten in because it was invalid or something...?

I'm going to try overwiting them with a different font and see what that does.

In game type F8 and type:

Screen_UV_BIAS   and then do enter, this will change view-settings back to normal.

liberator, find your renegade\data folder, usually C:\westwood\renegade\data. Find a file called "stylemgr" in that folder.

Find the line that says FONT_MENU=, and edit the font it = to this.

Regatta Condensed LET, 32, 0

That'll fix the problem.
