How can I record an Ingame Video of renegade without using a webcam or something like that? Is there a prog. that can record the things I'm doing in the game?

FRAPS cuts your FPS down so far to get the good quality video, that you can't get that good footage you wanted to get on video anyway so its useless. Also, file sizes=HUGE like 4 gigs for 5 min video. Someone should make a program for renegade thats like the built in video creator on the half-life series, you dont lag witht hat at all you cant even tell its recording, you can record for 3 or 4 horus and still be no were near 4 gigs. lol blackhand.

Way to make it not so huge... they ONLY good way to make it so you don't kill your cpu is to use ur video out on your card and put it out to the vcr and record it...
