Full agreement here.

I don't use skins that much - but I'd like to see what Zunnie said made available.

Yeah the forum was down before. But then they fixed it and put "Forum is up" on the homepage, but now it's down again :S

like i said who cares about those people any more now that renguard is out bones.ini is toast.....of course now people will try to get around renguard with their own hacks and edits and what not like they did on so many other games with anti-cheat programs but that will take a while so lets enjoy the ride while we can.....i take back what i said...as long as the renguard team keeps updating we wont need to worry about ANY cheats any more....wait screw EVERYTHING i just said cuz not all servers are running renguard as for members of SoQ using bones.ini i neither care nor want to hear about it here

We have a lot of fakers around who intend on damaging SoQ's name. Check with our forum to see if they are really members or not.

It sucks they do this but theres nothing we can do about it.

SoQnuker, SoQflamer, SoQranger, SoQbabby and a few others are all faking assholing. To mention a few.

xptekMost the reputable servers are running Renguard.

UGIN isnt yet, but that is the server host's decision...i spoke to Renx the other day (yesterday) gave him a few ideas i had in my head that renguard might be able to do or not...my problem is since the servers are new and stryderMX is still fighting the glitches in the Renegade Command bot he designed i didnt think putting renguard on an unstable bot server a good idea.....But i still am willing to try it out.

a server that doesnt run RG doesnt make it less reputable xpetk...but it will sure help me see who i've always suspected as cheating really cheats. And i wanna snipe knowing a/ it was a lag kill or b/ that person is better than me.
