You need to add your name to the ssc_ignore.txt in your SSC folder. If it doesn't exist create it.

Are you running Brenbot or the Stand alone server side client?

Ok, then you're going to want to put the ssc_ignore.txt in the directory that contains the brenbot exe.

Other people will see it but you wont. It's somewhat of a flaw in Gamespy.

Don't join other servers via parameters, that sucks!
And there are some servers who will kick u automatically...

When running Renegade FDS (GameSpy), is there a way to join your own server? I know you can with WOL but I was wondering if anyone knew how with GameSpy?
