After a long term of patching and updating rengaurd to almost if not quite perfect (within practical limits), would it be possible to make a new official Renegade Patch 1.038 that includes Rengaurd Client.

If that is reasonably possible, it would be kick@\$\$, especially since you have said your planning to add a map uploader function to Rengaurd.

If not possible within reason, then I hope your efforts to incorporate a map uploader into rengaude goes well at the very least.

A new Renegade patch isn't possible without the Renegade source code, and they don't have that.

And A map download function was taken into consideration, but I don't think it has been decided on yet.

..... And the blackcell assrammers will be like "OMG CRIMSSON IS TRYING TO TAKE OVER RENEGADE!!!"

I admit, it would be nice to have it as an update

Look, I'm not sure what is going on with this, and I'm not really involved either. I just want a cheat free environment, with lots of people using common community maps, while being able to host a black-cell inf or CTF mod with a cheat buster program.

What ever is going on between n00bstories and black-cell, keep it between your 2 organizations, I just want to have fun playing the game.

So, I respectfully ask that quikboy and aircraftkiller take this to another thread. I just want to have

fun playing the game. So just let me continue to use Rengaurd as I please while using a black-cell inf only and CTF mod.

Thank you very much.

edit:

Oh and cokemaster, are you going to support me in this? I know this is a public forum and free speech is everything, but can you help me out here with this?

It IS possible to patch the game without the SC (source code)!!!

but its difficult!
and of course i think there is work in progress to patch renegade!

so stay tuned

NOOOOOOO!!!!!!

Where is my crimson FANCLUB !!?!?!

who delated IT !?
argh..!!!
(i mean my very very c00l and very very n1 logo and signature)

SS217

And the NS kiddies are so far up crimson's ass they can pull her feces out for her. The only "assrammer" was the "assrammer" that cheated on Black-Cell servers faxme4 (Crimson)

And I'm sure those blackcell guys haven't touched a single cheat.... yeah right. Look the bottom line is what do you to lose by using Renguard? Nothing... well unless you cheat - then thats a different story.

It doesn't install trojans, backdoor software etc. It does not take your serial as your admin seems to think. Oh wait... he can't tell what a hash does in Renguard, even though there have been posts CLEARLY explaining what the hash does. It does not contain the serial, but clearly your admin knows whats right and must flame and spoil the program for the rest of the community.... oh and that tidbit vloktboky wanted to STEAL Renguard??

WTF are up with you guys, just get out and flame it on your own forums. If you have a problem with cheaters as you seem to be... then ban them? Are you having problems with that as well

Look, just go away. This is the Renguard support not the 'Black cell members flaming renguard because their admin says so'... somewhat that sounds similar to your post... so to get the quote straight:

Quote:And the Blackcell kiddies are so far up vloktboky's ass they can pull her feces out for him.

Now onto the post:

Yes I would like to see the Renguard application bundled into an update. However remember that the Renguard team would have to get access to the WOL update servers.

But it depends on whether its possible and workable for the Renguard team...

The only pointless thing around here is n00bs like you! You see a program on the internet that is suppose to be all good and you download it. Then your stuck with it cause your to lazy to unistall it and you get all boasted up with it. Then the cockyness gets started and yes you cant keep your head out of others you know what. Your now so hiped up on the thing that all you know how to do is copy what others say and follow them around.

I know this as a fact. I own a site that once the second beta is released will be bigger than renegade. I know what I'm talking about. When my site was open I had to close MSN becuse people asking me so many questions. People get hyped up and stubborn and stay that way.

Thought I would add that the only reason I didn't finish some of my sentences with what I normally would is because crimsons waiting for a reason to ban any black-cell mods.

If that is reasonably possible, it would be kick@\$\$, especially since you have said your planning to add a map uploader function to Rengaard.

If not possible within reason, then I hope your efforts to incorporate a map uploader into rengaude goes well at the very least.

I couldn't forget to respond to this to. You're the biggest n00b since n00bstories was opened.

Crimson will never get the power to release updates and if there ever was a new update rengaard wouldn't be in it for reasons you will find out in a day or so.

Westwood won't give out permission or change anything on renegade because it's no longer wanted. EA games doesn't want renegade anymore. They don't make a dime off it.

I'm sure the blackcell mods won't get banned for belonging to blackcell rather than the content of their posts etc.

It's funny how you assume the level of computer skills I have. Yes I know how to operate windows, yes I have been using my computers (I have more than one for almost 7 years now) and now.... OMG I CAN'T DO A BASIC UNINSTALL, OH HELP ME GOD. May I also add that I use other operating systems on a regular basis.

Displays the knowledge of your audience, most people here know the skill of uninstalling a program - based on your post most people at Blackcell including yourself don't.

I'll give you a hint - read the readme file, thought I'd also add you wouldn't be capable of responding to the posts... so keep up the 'OMG n00b!!'

Westwood wont give out permission or change anything on renegade because its nolonger wanted. EA games doesn't want renegade anymore. They dont make a dime off it.

That is a pretty strong statement to make. So are you some sort of expect on buiness pratic or something. I belive you ignored key statements I made, that should have more then made up for your concededly beligerant reply.

Quote:After a long term of patching and updating rengaurd to almost if not quite perfect (within practical limits), would it be possible to make a new offical Renegade Patch 1.038 that includes Rengaurd Client.

(within practical limits)

If that is reasonably possible

If not possible

How dare you call me a n00b and act like a total @\$\$hole. I did absolutly nothing to warrant that jack@\$\$ remarks you made, and I clearly knew that the possiblilty that it wouldn't work existed. If I didn't, those 3 key statements would not have been included, SO F*CK OFF N00B!

In addition to that, you handed out your MSN info so people could contect you, how stupid. You should have antisipated that people would ask you a bunch of questions, and you should have had a FAQ made before hand with pre-anwsered questions you could have easily have anticipated LONG before they even asked. Don't tell us you know what the h3!! you are talking about when you can't even ampilly prepare your site at start up and make the mistake of handing your MSN info out without a proper setup to handle the ammount of stuff you should have know before hand that you would get.

But it depends on whether its possible and workable for the Renguard team...

Of course Black-Cell moderators and admins have downloaded the cheats. But we don't fucking use them in public servers. Vloktboky steals nothing, he has never and whatever else you heard are complete lies. Black-Cell is working on a server-side anti-cheat, but you don't really need one with good 'ol moderation, which crimson79 seemed to lack when Black-Cell was linked to NS.

My "admin"? What Scrumfy types you take up with Scrumfy, I am not Scrumfy, don't put his posts on me I can't read his mind.

And another thing: I'm SO sick and tired of the little immature pranks NS pulls on us. assrammers.org, cheating in BCServ. If you hadn't pulled that shit I would leave you asses to do what you want to fucking do. And in all honesty if I was a member of NS and I heard those things I would leave. That's just childish, but none of you budge. Could it be that you are all suckups? Yes.

SS217Black-Cell is working on a server-side anti-cheat, but you don't really need one with good 'ol moderation, which crimson79 seemed to lack when Black-Cell was linked to NS.

If any server admin besides Black Cell thinks that their server operates fine the way it is, so be it. But I personally do not want my moderators tied up with every cheat accusation made. I want my moderators to be able to play, not babysit.

And what does my sniper server have to do with being linked to my IRC network???? I would think in your case you wouldn't want to bring up that time since it invites reminders of you giving out my old hub IP to a bunch of DDoS botnet owners.

My god Crimson. I did not know they were being as rude as this... I feel for ya. I can see why you have been more happy with our clan and visiting us on occassion. Even though we do not use renguard at this time, at least we don't get crude with you about things. And you have been really nice about it all with us. I was really curious after reading about all this nonsense in BC side, now seeing them flame you on your own system, thats just not right. I just want to say I'm sorry for all of the other affilate servers associated with back cell in one way or the other. BC is not keeping a good image in my mind at the moment. I think you know that the vast majority of regulars on both HT and BC servers do not share the feelings of some of these flammers.

ingy...
