I felt this needed to be seen on the renmod forums. These pictures are nice and really show alot of the pics of charceters vechiles and weapons.

<http://newhope.conquergaming.com/>

I just recently discovered a few new things and i didnt know by looking at the pics. Its coming along excellent. HTMLGOD Said it was around 90% complete. Expect realease soon. Icedog90 has re0-pposted all the pics and put them in nice javascipt window to view them in. Take a look

Your new stuff looks good, some of the texture maps need touch-ups (which you guys will probably do anyway... hopefully), especially the E-wing.

Yes, the E-Wing is terrible..terrible. We will be fixing a lot of stuff eventually, we just need to put together a lot of things for inernal beta testing. The E-Wing skin was done by Stryker, which he is now inactive.. Also, the model isn't that good either. One of my favorites is the Snowspeeder. I'll try to get pictures of levels as soon as I can, you guys will love those.

The Snowspeeder is excellent. Cant wait to fly that around. The E-wing is totally ugly. The cockpit is too narrow and the texture is horrible as already stated. I think the rebals should have the V-wing. A certain somebody showed me a model they made that would go great in the mod. I really like the pics icedog cant wait to see some more

I'm impressed with the A-wing, Y-wing and snow speeder, but where's the X-wing?

We just completed a new X-Wing model, and are waiting on the skin before we post pictures. And we've actually got a V-Wing model too, just skinning it has got me worried.

That is the current status of our new X-Wing model. It's wings will open and close according to speed - open for high speed attack runs, and close for low speed landings and when not in use.
