"Trying to connect to server #1...Connected

Connected to server.

Welcome to RenGuard , LIGHTSIDE!

To launch Renegade, please click 'Renegade'.

Bad/Corrupted file data\always.dat has been found in your renegade directory"

Is this anything to do with renguard? Or do I need to re-install ren or something?

If restarting doesn't work just reinstall Renegade to fix the file, I had some probs with my always.dat file a few times since I got RenGuard & the only way it'd fix for me is by reinstalling.
:rolleyes:
