Since its AVI format I assume its DIVX or XVID format. Install the codec and you will get video.

I think you're confusing things here.

Great video, can't wait for the release... but I gotta say you chose the music perfectly. For those that don't know, it's called Hysteria by muse.

Probably am, I get confused all the time lol
but I think I saw a similar model of the buggy you are using in commando.
Isn't that the E3 model??
Or am I wrong? :rolleyes:

Show-offs

Well, now there's another mod to add to the list of mods I will play. It looks great, even if I'm not convinced with the light tank model, but hey even the greatest of things have flaws.

Great synching with the music btw, I was especially impressed with the synching of cuts to Dominic's drumming.

One last thing, how the fuck does anyone mistake Muse for Sum 41, or are you purposely trying to insult Matt Belamy?
