You apparently have no appreciation for how hard making this map, and it's ambient lighting must have been.

The Ion storm in, and of itself is worth special note, not to mention the damage causing meteor strikes.

I think you have to draw the line on update and add-on
Blackhand studios are working on improving Renegade Game experience.
Adding new maps will be more of an add-on. Fixing current WW maps isn't an add-on, but more of an upgrade.

Upgrade | Add-on

No problem. I like his building destruction animations as well. They are worth checking out.

Could anyone give me the name and location (Europe, Pacific etc.) of a server that runs his work?
