I...

i try to open a server, but it say's :

seperate renegade server -> plz wait

the people who join can play, but i not , the monitor is qite white with this message, why.

when you know why, tell me, and tell me how to make an server to play correctly

thx

uncheck the "dedicated Server" option when you host

if you want to host a ded server, don't use the in game thing use this:

ftp://ftp.westwood.com/pub/renegade/dedicatedserver/RenegadeFDS\_1037.exe

hi, i 'am here

but one problem, i require a serial number @ <http://renegadeserver.westwood.com>

but it didn't send it, and i needed it to install the dedicated server program

You can't play on your own dedicated server. Un-check the "Dedicated Server" option in game, you can't play using the FDS.

There are two ways you run a FDS and play renegade on the same computer.

Option 1) Start renegade before starting FDS

Option 2) Depending on OS you can have multiple users logged in at the same time. Use one user account to run FDS, log out and use another and you can launch renegade.

Warning: This will cause your server to lag, depending on your computer it may cut SFPS by two thirds.

Get a dedicated server from <http://www.servermatrix.com> if you would like a lag free game.
