[View Forum Message](#) <> [Reply to Message](#)

Ok so I had this problem when I tried to log onto Westwood Online saying I needed to reinstall Shared Internet Components, so I reinstalled and I thought I'd be able to play Renegade again . However Renguard needed to be reinstalled so I reinstalled Renguard. Now when I open Renegade I get the Renguard window so I press the Renegade button and this message pops up:

"The Procedure entry point
?Detect_Bandwidth@@YAKKKHAAHAAKKPAUtBandtestSettingStruct@@PAD>@Z could not
be located in the dynamic link library BandTest.dll"

I tried to a few times and got the same message, at which point I broke down into tears. I know it's probably got nothing to do with Renguard but I don't have a clue what to do and was just wondering if anyone had any idea what I should do or if my computer is just completely FUBAR and I should just throw it out my window and get another.

[View Forum Message](#) <> [Reply to Message](#)

You need to make sure you upgrade Renegade to version 1.037 BEFORE you install RenGuard. Uninstall RenGuard, patch Renegade, then install RenGuard again and it should work.

Pardon my ignorance, but who's Blazer?

To, The Chaotic One, I was looking at that picture in your signature box and just wondering how do you know that info about my computer.

Subject: I need help, I'm having withdrawal symptoms from Renegade!

Posted by [Blazer](#) on Wed, 19 May 2004 16:17:38 GMT

[View Forum Message](#) <> [Reply to Message](#)

I am me

As for that Sig you are worried about, don't worry. It just uses the information your computer sends to EVERY website you visit to dynamically display your IP and browser type. Basically the image is a link to a php script on his site (or a site that provides the "service"), that gets your browser info, overlays it on an image, and spits out the image data to be displayed.

Posted by [Toolstyle](#) on Wed, 19 May 2004 18:46:17 GMT

[View Forum Message](#) <> [Reply to Message](#)

Thanx, it just freaked me out that it showed all that info.

Is there any reason why you should "hunt me down"?

[View Forum Message](#) <> [Reply to Message](#)

Aaah, ok.

Anyhoodle, I got another problem with Renegade now, I can get onto the game but not onto any servers. It loads the game then when the "Message of the Day" box appears it just goes back to the Renguard window.

Posted by [The_Chaotic_One](#) on Wed, 19 May 2004 19:28:23 GMT

[View Forum Message](#) <> [Reply to Message](#)

lol i freaked you out with my sig? You can get them at <http://www.danasoft.com>. I think they still let you make them...

Anyway, I don't know how to help you there. But about what Blazer said, I kind of changed it around ...

Blazer I am me

As for that Sig you are worried about, don't worry. It gathers the information your computer sends to EVERY website you visit to dynamically display your IP and browser type. Then it uses that information to hack your mind with the infamous m00hack and destroys it. Then you become The_Chaotic_One's mindless slave.

Not sure about this 1, but I think I might have an idea. Try cutting off your firewall. Or go to a different server.

I've tried loads of different servers on each or the different areas, (Euraope, USA and Pacific) and

I could only get onto one USA one and that was a capture the flag one and it got a bit old after a while.

The first thing I did was turn off my firewall and it didnt help. thanks for suggesting it though.

I can play on Reborn but the only server on there has dissapeared so I can't even do that now

When my Renegade doesn't work, I always play something else. I sometimes play YR, I beat the living shit out of my Generals game(:twisted:), and play a game called Runescape. Haven't played YR or RS in a while, but i shoot my Generals game with my BB gun every day :twisted: . When it gets broke, I just either glue it or tape it back together and do it again.

AOL, but I just figured out the problem. It is a bug in the new RenGuard version. Because I played a game, then got off and installed RG. Then I tried the same server, and it did the same thing it is doing to you. Crimson, please fix this.

Subject: I need help, I'm having withdrawal symptoms from Renegade!

Is there a message in the text area of RenGuard?

Subject: I need help, I'm having withdrawal symptoms from Renegade!

Posted by [Toolstyle](#) on Wed, 19 May 2004 23:54:59 GMT

[View Forum Message](#) <> [Reply to Message](#)

Just the usual when I go on it;

Quote:[00] Trying to connect to server #1...Connected

[00] Secure link established.

[00] Welcome to RenGuard , Toolstyle!

[00] To launch Renegade, please click 'Renegade'.

[00] WARNING: Model Textures (Skins) have been detected on your client! You will not be able to join a pure server.

I know the last one says I won't be able to go on pure servers but I was trying to go on the ones normally go on, then I tried some more, I can go on the SoQ Fansite ones.

I'll try putting my skins somewhere and see what happens then.

[View Forum Message](#) <> [Reply to Message](#)

So basically your telling me my computer is FUBAR?

Subject: I need help, I'm having withdrawal symptoms from Renegade!

Posted by [Crimson](#) on Thu, 20 May 2004 00:03:17 GMT

[View Forum Message](#) <> [Reply to Message](#)

No, but are those messages from BEFORE or AFTER Renegade closes itself? If they are from BEFORE, then I need to see what they say AFTER. Then we can figure out why.

It sounds to me like an abnormal termination if the renguard isn't reporting anything. That's an occasional bug with ww online anyway, but if it happens every time..

You should run game2 from westwood\renegade in the meantime.
