[View Forum Message](#) <> [Reply to Message](#)

Server Matrix is going to lose a LOT of customers, and Renegade will lose a LOT of servers if everyone doesn't get their asses in this thread on their forums RIGHT NOW and support my stance on this issue.

<http://forums.servermatrix.com/viewtopic.html?t=7151&postdays=0&postorder=asc&start=0>

Even if you don't run a server, or you run it elsewhere... just show your support for my stance on here before every server running a bot that connects to IRC will have to be shut down or run without a regulator.

[View Forum Message](#) <> [Reply to Message](#)

There, I threw my support behind you, even though I have no comprehension of this whole IRC thing other than I like bots.

I support Crimson.

Posted by [Crimson](#) on Sat, 22 May 2004 22:35:01 GMT

[View Forum Message](#) <> [Reply to Message](#)

it's very simple. Client does not equal server. Their AUP says server, BRenBot/BR.NET/etc are clients. Case closed.

Alkaline is nothing but a moron. What i said made perfect sense, i did not say i ran a server, but i do know how much IRC is used, because i mod in lots of them, and i have actually ran a server before, just not at the moment. Was i correct in what i said in my first post?

Quote:I may not have ran a server, but I am moderator on quite a few (all n00bstories.com servers, End of Evolution Clan servers to name a few) And I am also an IRC user. If you disallow use of IRC you will be killing many servers, lossing buisness. With out these applications that use IRC we can not effectivly mod our servers to give players the best gaming experience possible, and won't be able to do a lot of other cool stuff that these applications let us do

And, this alkaline guy is a ass, i would VERY highly suggest that nothing that comes out of his mouth be trusted, or taken seriously. The Renegade Forums community has already had to put up with him, leading to an fan club even of people that hated him and wanted him banned, weeks of post doing nothing but asking him to leave, and eventually leading to his ban. Take this into consideration before you take anything he says and run wiht it.

EnglandA datacentre isnt gonna change its TOS for a 50 odd people, when it has more then 10000 customers to protect.

They ARE changing the AUP, to specifically say that no IRC or IRC-like traffic of ANY kind (including bots or as a client) are permitted It still remains to be seen if they are going to shutdown the 20+ servers running irc bots.

[View Forum Message](#) <> [Reply to Message](#)

Because no IRC traffic is (going to be) allowed, so it doesn't matter which channel.

I say this is pretty shitty from SM, I think the best you could try to do is

- convince them that your servers pose no security risk at all
- try to find as many servers that would be breaking the new rules (both in the Ren and other communities) and threaten to move to their competitors en masse.

Very stupid move on their part, they'll be losing 1000s of \$\$\$ if they go through with this. Maybe smaller hosts will take advantage of this though, maybe by lowering prices on dedicated boxes, and doing more advertising.

I just wanted to note one thing that I find to be very important:

I read the thread on the servermatrix.com forums, and I'm appalled at how some of you acted. Particularly, Aeonreaper, SuperFlyingEngi, and Cowmisfit. I realize the amount of damage Alkaline has done/is doing to the Renegade community, but the forums for many of Ren's top server hosters is not the place to stage a flame battle! Do you realize the administrators of Server Matrix can see how childishly you are representing the Ren community--and possibly Crimson in their eyes? I'm not saying this as a "shut the hell up", but as a caution for the whole community. We lost support of Ren's developer (EA) at the start. We don't need any more problems.

And if I just sounded like an total idiot, oh well...

[View Forum Message](#) <> [Reply to Message](#)

Bombario - the question is do they want to lose thousands of dollars from removing all the n00bstories and BC servers?

The answer would probably be no.
