Everytime i visit this site, then if i switch between sites in my favorites it has some page transition/fading in it.
Its bugging me...
How do i prevent that from happening. It only happens AFTER i visit THIS site!

Page transitions are gay. I wouldn't have them here.

Hmm thats VERY strange then.
i tested it a few times now and it ONLY happens AFTER i visit here and click on another link in my favorites :S

Its coming from here i think :S hmm..
investigating... :/

View the source code. No page transitions. I hate them. I have them enabled in my browser and I don't see them.

This is off-topic, but I've been having a problem selecting an avatar for a while now. Whenever I

choose a category (or select one from the first category that comes up) it says "invalid_session". I have no idea whats wrong.

Hm.. maybe its something i installed then :S
Didnt install nothing for weeks though except RG1.03
hehe

weird ..
