What would be good is to be able to download/create your own themes for RenGuard.

Like be able to skin RenGuard and also change sounds and other such things.

To be able to customize your RenGuard to the way you want it!

Any ideas?

Ya...I was kinda thinking bout the same thing about 3 days ago, thinking more along the lines of like "wouldn't it be nice if there was more than 1 notification sound & that the people could choose the 1 they liked best?"
A few people I asked, that were friends of mine, said that it was a good idea, that perhaps it should be done, & that if it is, it could make RenGuard alot more popular.
But that was just an idea that myself & a few friends agreed was a good idea. :rolleyes:

An EVA type voice would be cool, if you could find anyone who sounded like that.....
