I'm wondering if anyone has that cut scene that was removed from the game. Sometime ago, I found this video done by these people with a video camera showing Renegade. They showed the removed cut scene as well as the first level in it. I lost it since then and can't remember where I got it from, but I was wondering if anyone actually has the proper removed version. There are pictures of it on Seaman's site:

(At the top)

I just feel like watching it if anyone has it.

Okay, do you wish that I put the cutscene video on the site?

It's not the real thing, just a preview that features it.
