I can't use an avatar because every time I click "show gallery", then select any gallery in the list, it comes up with "Invalid_Session". Even trying to use an avatar from the default gallery that pops up, the same message comes up. It's been like this since I can remember, which is several months. Any idea what the trouble is? I think a few other people've been having the same problem, I remember bringing it up once and crimson said she'd just changed something and would have a look at it but that's the last I heard about it

Yeah, that's the same... you can upload your own now though since I can't figure out how to fix the session bug.

You just click the "Back" button and hit do whatever you did before again..
