More and more servers today are adding the a1 or a11 or something in front of their server names to get people joining them... My server name begins with a C and I am half way down the list

Another thing I have noticed is 9/13 servers (CURRENTLY) are empty. Most of them are empty around the clock as well.

Is it really necessary to bump the servers like that? If people keep going down, then people will keep TRYING to go up and we are going to get hostnames like a0000000 :rolleyes:

Yeah, you see that often with that sort of lists. I just look at the pings and the amount of players, and attention whores like that I usually boycott

I agree, bumping your server to the top is just selling out. Not only that, you'll get a lot of inexperienced players who don't care what server they join. But hey, I guess that could be considered a punishment.

When I (used to) play, I would sort by pings. So I don't even take notice of the host names or server names.

IRON-FARTWhen I (used to) play, I would sort by pings. So I don't even take notice of the host names or server names.

Pings make a huge difference if you are not in the top five pings it can be a ghost town on your server.

Not always. The really low ping games tend to be full alot. And servers that are low-ping to me may not be to others, so many servers (in theory) should be occupied by players from different areas if they all go by ping.

Heh, everyone please take note of a00000sfv (or close to). We have joined the list of idiots to do this, pretty soon we will see a00000000, then a00000001. At some point it must end because this is getting retarded. But, my server just went to 20 players so I want to see it full, like everyone else, so join the crew, right?

The name thing only works for people who sort by name. There are many other things to sort by. Ping, Players, Laddered etc.
Just don't sort by them and you wont see the a11 servers.

Tilly

CrimsonIt worked for me.

Your servers are just as empty I swear.

As for the rest of the bumping, I don't care because our servers have great pings so we are always on the top of that list.

It's not against the law, and there's nothing you can do about it, so what's so bad about it? It's only the lame 10 player servers that are trying to bump..

Anyways... i list mine by Players anyway

No its not against the law (duh)
i still think it looks and is really stupid

Hate to say this, but it did work for me

Yesturday our server was full all day except when we had clan practice, and right now there is 10/20 people in it, but it is early yet.
