Someone please help me here! I have a problem. Every time I try to join ANY Renegade Game such as: n00bstories, EoE, Cugsworld, Alkaline etc. I get a message saying SERVER ERROR: Version Mismatch! I've Patched my game to 1.037 with a download from 3dgamers (patch identical to WOL patch). I've also tried reinstalling Renegade about 3 times now and it still won't work! I've, when reinstalling, removed the Westwood Directory, All Westwood Registry Keys, and Shared Internet. Infact, I had cleaned the computer of any Westwood files just like new. But of course, I still get Version Mismatch. I never used to get this and it really angers me ! So if someone could help me that'd be great thanks!

try just downloading it from the game itself. Maybe where you are downloading it from isn't the exact same as the westwood patch.
