When RenGuard starts up, does it welcome you by name?

When do you mean? I don't think so. I downloaded it to my desktop then it installed it to the C:westwood/renegade folder. I havn't tryed it yet after I redownloaded it. I am going to try that today.

At the bottom of RenGuard it should say "Welcome to RenGuard, <yourname>"... if your name is NOT there, then you are not logged into RenGuard. If that's the case, we can help you fix it.

I also recommend our support channel irc.n00bstories.com, #renguard_support to get help real-time.
