Not a flame or in anyway a complaint.few bugs1) few purchase terminals didnt work2) water at edge is as if its not there and you can go under it.3) cant drive ssm (is this a bug ?)4) nod can use gdi sam site, and can take out the base with 1 shot per building5) harvester on gdi side get stuck trying to drive through tib refenery. but if you get in and drive it round it is fine.i would have to say its a great mod, i will post screenies in this thread to show everyone what youre mod is about. i dont take any credit for it .. just posting you excellent work dude.

quote: O, BTW, I heard about the Serial stealing and I just don't really care anymore. It's all Bull.... Your risk not mine. He took serial keys from us. Question is what will he take from you if you let your guard down? Passwords to your chat software? Email passwords? Or access to your entire system so he can fubar it and make it a \$2,000 paperweight? But your choice if you want to risk it.Kai

I personally had my Serial taken and used.I had to buy the game again. He has done a federal offense.Stealing. Not just 1 persons Serial, but over 450 peoples. You say "give him a break". This isn't my first run in with the kid. I've met him on Tribes2, Counter-Strike, and a few other games. He has never done anything THIS bold, but he has done illegal things. He committed a CRIME.He didn't just make a virus that can go away with reformat, even though that is illegal. He took 450 peoples \$40-50 and used that. He took away their right to play. He deserves to be in court, which I hear, he will be in soon. I hope that is true.This is not a flame, this is a simple stating of the facts. He goes around acting like it never happened, trying to regain all of our trust so he can do something like this again.BTW, Griever, is that even possible? You would have to restart your comp every 5 min, wouldn't you?

Good job Guys !! I did enjoy ur mod , But there is a numbers of bugs! 1st of all I host it in a slave server , the admin is a GOD ! Nobody can do any damage with any weapons , but only the admin can do damage on stuff! So it was like we all be chicken & run away from the admin ! LOL!!! 2. At the very beginning , the dino & that man (well , i don't know what he is , just the new 1 , u should know) work fine! But somehow in the med game, they can no longer get out of the building, they just stay on the ground no matter how hard u run or jump , they got pull back to the original location! 3 Can u make the havester do the loading off when we are in it?? Cause we ramp the door of the refinery so hard, & nothing happen! 4 Whenever we shoot , our credit will drop back to zero! 5 this is not a bug , but i think if the A-10 has more Health will be so great ^.^! So i think this is all! Anyway , great job!! I look forward for ur non-buggy version! Fans of Buzz mod!

the money goes to 0 isnt this mods fault, i had this mod and multimod installed, and that happend, and when i deleted multimod it never happened again, most of the mods that are crappy, and dont work well'tall have some type of horrible thing inside it that reach out and corrupt renegade!

quote: BTW , did buzz really still CD-KEY ?? Or are those rumours ?? If he did, where is the hard

---

evidence??& how can he steal it with a PKG file??Yes he did.He made a script and his installer had a trojan in it that stole your serial and world data key. We know it was his script.The hard evidence is it was his script, the trojan uploaded the keys to his personal FTP space at DK3.com, he bragged about it to his clan two days before he got caught, and he confessed to five people in this community.Since then though he has changed his story and retracted everything. But we all know and he will pay for it one way or another.That is why I remind everyone of it so they wont let their guard down with him.Kai[ April 25, 2002: Message edited by: kaibigan31 ]
