Cool, I'll be porting this stuff to Indy, though. (Boo .NET!)

What license is the code under? A copyleft license or a BSD-style license?

I think it's filed under the "Dante doesn't care anymore" license.

This is very very kind of you Dante,

You are one hell of a man. I'm sure that there are many other people out there who would not have done this after the amount of time you have spent on all this code.

Great though!

Tilly

upgrade, no

if there are bugs that need to be fixed (other then the fact that i KNOW it can be a bitch to setup), then i will fix them.
