Hi I recently bought this game but when I try to install it a black screen shows up and says setup.exe error and returns to my desktop. I've heard of the alternate installer and have downloaded it but when installing from that i get a runtime error 91 , It would be very helpful if someone could tell me how to solve this problem. Thanks.

What's your hardware? Most importantly, your graphics card.

And there's your answer. voodoo cards aren't DirectX 8 compatible.

Even if you do get it installed correctly, you're still not going to be able to play.

How much do you have to spend? You can probably score a decent nvidia or ATI card off ebay.
