Yes...

I looked at it for about 3 seconds, wondered what the HELL I was doing, then went back to sleep.

For those who missed it:

Little black dot moves across a large bright ball slowly. World says "Ooooh, ahhh." and it's over.

You missed nothing.

I didn't see it, but heard about it non-stop. It's interesting to see the scale in comparison, but again, it's only a black dot moving across our universal light source.
