1) Quite a lot of the time, the renguard page that shows up after u quit ren, keeps saying "cannot connect to server" or something... is this to do with my IE or is it renguard?

2) Is there anyway to log in with a different name once ren is loaded? Just the other day i was using visorneon nick, then i switched to TwAVisor and it said i wasnt running RenGuard, even though i was

Reguard only recognizes the last name you had logged in as. If you change it at any time, you need to log on to WOL, quit, restart RenGuard and log back in to WOL using the same nick. You can tell what nick your on under when you start up RenGuard.

Welcome to RenGuard , (name here)!

I think you're getting 'page can not be displayed' if your connection times out when trying to get the MOTD for the server you log into. We probably need to add a delay or something.

Yes the "page cannot be displayed" happens quite often to me too.

Heh, just stating the only current way to do it

(Hint, hint... nudge, nudge... Renguard team)
