**Subject: I have problems running RenGuard...please help**
Posted by px4545454 on Tue, 15 Jun 2004 06:02:54 GMT

This is the error message i got when i tryed to run RenGuard.

>Buffer overrun detected!

>A buffer overrun has been detected which has corrupted the program's >internal state. The program cannot safely continue execution and must now >be terminated.

What should i do? Should i reinstall the game.

I get that error all the time, it used to be 1/20 times it did work, now it is 1/70, I do get mad sometimes but it does work, but then most of the time after about 5 times i am trying to open it, it does this

TRYING TO CONNECT TO SERVER #1... CONNECTED
SECURE LINK ESTABLISHED

then it just stays there, does nothing page doesnt load, i can click renegade and i do but the servers say i dont run rengaurd someone 1 plz help

I found a way to get past the error message i get. when you launch RenGuard keep clicking the renegade button and renegade will launch whith error message window in the background.

YES! do that, but hit options instead and hit automaticly run renegade at start up, and ignore that error message leave it alone and it works!

Get the VB6.0 runtime files from http://www.completelyfreesoftware.com/vb_runtime_files.html which should hopefully fix the error completely. Someone had the same problem a few days ago and that sorted it out.

<>

I'll give it a try.

thx

completely. Someone had the same problem a few days ago and that sorted it out.

That would be strange, since RG is compiled with Visual C++ 7.1, maybe it updates a
dependency thru, let me know if this does indeed fix that problem.
