WOW! It's as tall as that pen! I could fit that thing in my pocket (literally, I have huge pockets)  
OMG I can't wait until that comes out.

What about the price?

Edit: 1.299,00€

Lol, why would I pay that much for something that's most likely going to overheat?

OMG that thing is sooo cute!!!!

It has similar specs to my computer though, with a faster processor and same amount of memory (I have no idea about bus speeds and whatnot), but doesn't come close to matching my Radeon.

BTW, what website did you find that computer at?
