With the GDI and Nod Chinooks the rotors stop 'rotating' once you exit the vehicle. However, with the Nod Apache they just continue spinning.

Fixable?

Already fixed.

Check out the commando website thing, plus the models are already RenGuard approved.
Edit: Because I really don't want to do maths, <http://www.cannis.net/commando/model.php>

Doesn't look like a Chinook, isn't called a Chinook, so that makes it... a Chinook?

Yeah but it is just a temporary fix. It causes Renegade to crash in SP mode.

KaiserPandaDoesn't look like a Chinook, isn't called a Chinook, so that makes it... a Chinook?

Westwood forgot to add the turbines.

Or Westwood wasn't making it a Chinook, therefore didn't forget anything.

They didn't forget to add anything, because that's not a Chinook, it's a Transport Helicopter.

The actual version of it is a CH-46 Sea Knight. The Marines and Navy use it.

Though in the original C&C it was indeed a CH-47 Chinook.
It was called Transport "Chinook" Helicopter.

In-game, it's called a Transport Helicopter. I couldn't care less what you think the manual says.

SeaManIt was called Transport "Chinook" Helicopter. In Red Alert and Aircraftkiller is right in Tiberian Dawn it's called Transport but on cameo render and ingame shp it's Chinook.
