I made a low poly GDI soldier and need some feedback to help me improve it.

Its ok but it should be in the mod section. Its better than I could do , Ive never attempted a infantry model.

I kinda like it,
put a skin on that and you might be getting somewhere.

Nice work

All I can say is to make the arms a bit thicker, and the legs less rectangular.

Legs are fine for being low poly, but those arms are way too thin.

Quote:have you had any experience with other game modeling before?

No, I've only ever made 3d models for renegade.

Thx for the feedback, I see what you guys mean about the arms being too thin.

Yeah, the arms are too thin, and what are those tiny little things sticking out of the shoulder pads? So, there's the shoulder pad part, and then there are like little mini shoulder pads or something sticking out of those, and I personally don't think they really belong. Beyond that, the model looks great.

Looks a little like Buzz Lightyear, it's pretty cool.

You should make some sort of Jetpack soldier with it

JWPnow that would be telling

Why did you resign, No.6?

grrr I'm still not happy with it
<http://www.n00bstories.com/image.view.php?id=1351251766>
I have no idea why though

The legs look a little bit like mecha or something, it would be nice if they were a bit rounder.

[View Forum Message](#) <> [Reply to Message](#)

Use that pic as a model. I think the arms of your model are too long and some body and head parts need some work, but nice start anyway
