Okay, I decided to try Aston out, so I downloaded the trial version when I came across a slight problem, I can't get it to do anything other than change colours and Icons. I can't get any of the toolbars or plugins to actually work. Can anyone help me out?

Since I've never had any problems with it, I really wouldn't be much help. They do, although, have an active support forum at http://www.astonshell.com/forum/ and you should recieve a quick response there.
