i'm getting bloody crazy from RenGuard

Problems:

- BrenBot Renguard doesn't work, it's just not on (while i put it on, settings are correct)
- SSC can't read ssc_ignore.txt since it is there and every setting is correct.
- I cant play cuz I connect through network, not Internet.
- Renguard SSC keeps crashing somehow, sometimes it works sometimes it doesn't.
- Renevo SSC doesn't work properly, causes lag in the server uses ALOT of memory somehow, hangs every 20 minutes and doesnt kick people out of the server without renguard.. Sometimes it does only after 10 minutes.
- MOTD doesnt work with any of the SSC's and server doesnt appear in renguard server list

Main thing, i'm getting sick of this since it's a bloody pain in the ass.
There are stupid errors in every SSC, Renevo's SSC Brenbot and normal SSC.
And again EVERY setting is totally correct, I checked it about 48 times

Say it here,

Since my computer crashed and on (m)IRC nobody responds

With the set of problems you have going on, it's best if you go through it step-by-step...

Do you currently use any software to regulate your server? If not, I would recommend BRenBot and I can walk you through it from there. I use BRenBot with RenGuard enabled on all of my servers.

Tell me for BRenBot

I can use any program so if one works i'm already happy enough

Are you able to get BRenBot functioning regardless of RenGuard?

Yes ofcourse
I can get any Admin tool work on it

but tell me about BRenBot

Quote:-BRenBot Renguard doesn't work, it's just not on (while i put it on, settings are correct)

once you have turned on renguard via the !set renguard on command, you need to restart BrenBot

Quote:-SSC can't read ssc_ignore.txt since it is there and every setting is correct.

you need to create the text file and add it to your BrenBot/SSC directory

Quote:-I cant play cuzz I connect through network, not Internet.

add your name to SCC_Ignore.txt, the format is:

```
<name1>  
<name2>  
<name3>
```

etc

Quote:-Renevo SSC doesn't work properly, causes lag in the server uses ALOT of memory somehow, hangs every 20 minutes and doesnt kick people out of the server without renguard.. Sometimes it does only after 10 minutes.

RenEvo SSC suxs anyway

Quote:-MOTD doesnt work with any of the SSC's and server doesnt appear in renguard server list

have you requested a MOTD from <http://www.renguard.com>?
