I thought I'd start a thread to see what crazy, insane glitches we have seen. I have seen many but by far the most annoying is when you get in a vehicle and fall through the ground or are launched into outer space, which causes the framerate to fall through the floor.

The worst one is probably the one that gives you a constant 2 FPS when you enter a vehicle, because it's difficult to get to the quit button. modify your registry to stop the quit confirm dialog come up.

But the most annoying insane one is where you enter a vehicle, fall into blue hell, hit E to exit the vehicle and move around in laggy warps with atrocities appearing in splits across the screen.. although you can fix it by rejoining, the vehicle you lost takes away from the vehicle limit.

I like the see through WF on city flying. If you haven't seen it stand facing the bar. in the corner to the left of the door by the bay. make sure you are in the corner and look right to left you should be able to see through the wf wall.

there is a similar one on walls behind the rock on the right of the gdi entrance. You can see everything going on in GDI's base and still be behind the wall. Scared the hell out of me the first time i saw it.

I like the one where you can walk on top of the map on Glacier and you get a gunner and people start going insane and saying: "OMGFGM!?! WTF?!@? ROCKETZ FROM TEH SKYEZ!?!?!"

Then there is the team kill glitch which is very funny too....
